Master's in AI/Data Science

EDUCATION

High school degree in Experimental sciences

High school of Salah EDDINE AL AYOUBI • GPA: 10,95/20

Batna,Algeria • Sep 2018 – Aug 2022

Bachelor's in Computer Systems

University Center Si El Houas Barika • GPA: 13,88/20

Barika,Algeria • Sep 2022 – Jul 2025

Relevant Coursework : Artificial intelligence , Security , Operating System , Semi-Structured Data , Algorithms and data structure , Networks , Database , Object-oriented programming.

Master's in Artificial intelligence and data science

University Abdelhamid Mehri Constantine 2

Constantine,Algeria • Sep 2025 – Present

Relevant Coursework : Advanced Operation Research , Data mining , Foundation Of Artificial Intelligence , Statistics for Data Science , Cyber Security Intelligence , Distributed Systems and Cloud Computing .

CERTIFICATIONS

Python in Data Science

IBM

Sep 2025 – Nov 2025

Scientific Computing with Python

freecodecamp

Sep 2025 – Nov 2025

EF SET English Certificate — C1 Level (66/100)

EF SET

Jan 2025 – Jan 2025

PROJECTS

Shape Recognizer

University Project

Sep 2025 – Jan 2026

- Developed a supervised classification model using SVM, Random Forest, and KNN .
- Performed feature extraction and preprocessing .
- Compared model performance using accuracy and confusion matrix .
- Real time testing on a web interface using Django .

Premier League winner prediction

Personal Project

Oct 2025 – Nov 2025

Building an Artificial intelligence model that predicts the premier league winner using API for every game's score and predict the winner of that game and then predicting the winner of the PL at the end.

Qawafil Association

Qawafil Association

Feb 2025 – May 2025

Full-Stack Web Development Project | Django, Python, HTML, CSS, JavaScript :

- Developed a custom web portal to streamline event, online competition and educational material management of the a science & cultural association.
- Built a web application (including both front and back end) with Django(Python)/HTML/CSS/JS.
- Constructed the architecture of the system from UML Diagrams (Use Case, Class and Sequence diagram) prior to implementation.
- Established a reliable user authentication system with unique ID verification for competition entry.

- Realised event management and course modules with multimedia support (PDF, video, audio).
- Implemented an online timed competition system with auto-judging and answer tracking.
- Developed an admin dashboard to handle users, events, courses and surveys.
- Made site responsive for computers and mobile devices.
- Git & GitHub were utilized for versioning and group work.

SKILLS

- | | | | |
|-----------------|--------------------|---|---|
| • Python | • Html | • Data Analysis (Pandas, NumPy, Matplotlib) | • Supervised and Unsupervised development |
| • Java | • Css | | |
| • C | • Django | | |
| • Deep learning | • Machine Learning | | |

Languages

- English (C1)
- Arabic (Native)
- French (B1)
- German (A1).
