AI and Data Science Master's student with hands-on experience across the full ML pipeline — from feature engineering and model selection to performance evaluation. Built projects spanning computer vision, sports analytics, and full-stack web development. Strong Python ecosystem skills and C1 English, actively seeking opportunities to apply data-driven solutions to real-world challenges

Education

Master's Degree : Artificial intelligence and data science

University Abdelhamid Mehri Constantine 2 - Constantine, Algeria

- **Relevant Coursework** : Advanced Operation Research , Data mining , Foundation Of Artificial Intelligence , Statistics for Data Science , Cyber Security Intelligence , Distributed Systems and Cloud Computing .

09/2025 - Present

Bachelor's: Computer Systems

University Center Si El Houas Barika - Barika, Algeria

- **Relevant Coursework** : Artificial intelligence , Security , Operating System , Semi-Structured Data , Algorithms and data structure , Networks , Database , Object-oriented programming.

09/2022 - 07/2025

High school degree: Experimental sciences

High School of Salah EDDINE AL AYOUBI - Batna, Algeria

09/2018 - 07/2022

PROJECTS

Shape Recognizer (09/2025 - 01/2026)

- Developed a supervised classification model using SVM, Random Forest, and KNN.
- Performed feature extraction and preprocessing
- Compared model performance using accuracy and confusion matrix.
- Real time testing on a web interface using Django.
- Achieved 93% classification accuracy using Random Forest.

Premier League winner prediction (10/2025 - 11/2025)

- Building an Artificial intelligence model that predicts the premier league winner using API for every game's score and predict the winner of that game and then predicting the winner of the PL at the end.

Qawafil Association (02/2025 - 05/2025)

- Developed a full-stack web portal for a science & cultural association using Django, Python, HTML, CSS, and JavaScript.
- Designed system architecture using UML diagrams and implemented user authentication, event management, and multimedia course modules.
- Built an online timed competition system with auto-judging, an admin dashboard, and responsive design across all devices.

Experience

Apr 2025 - Internship Student

Apr 2025 *Algérie Télécom, Batna*

- Completed a practical internship at Algérie Télécom's Network Transport Maintenance department in Batna, gaining hands-on exposure to telecommunications infrastructure and network maintenance operations.

Certifications

- Python in Data Science - IBM - Oct 2025 to Nov 2025
- Scientific Computing with Python - Freecodecamp - Oct 2025 to Nov 2025
- EF SET English Certificate — C1 Level (66/100) - Jan 2025

Skills

Programming : Python , Java , C

Data Analysis : Pandas , NumPy , Matplotlib

Deep Learning : PyTorch

Web Development : HTML , CSS , DJANGO

Machine Learning : KNN , Random Forest , SVM

Languages

Arabic (Native)

English (C1)

French (B1)

German (A1)
